

CYCLOHEXYLAMINE

IUPAC NAME: cyclohexanamine.

Formula: C₆H₁₁NH₂

Boiling point : 134°C

Density : 0.86 g/cm³

PRODUCT DETAILS : Cyclohexylamine is an organic compound, belonging to the aliphatic amine class. It is a colorless liquid, although, like many amines, samples are often colored due to contaminants. It has a fishy odor and is miscible with water. Like other amines, it is a weak base, compared to strong bases such as NaOH, but it is a stronger base than its aromatic analog, aniline.
